

Note: The Alexa and the Flask server are on the same Raspberry Pi.

\*NOTE: The security of using ngrok to expose the raspberry pi flask server is currently being investigated. As a result, the ngrok layer is currently being used for quick and easy testing and may not appear in our final build.

Alternative

[If user's recording is loud enough]  
Continue

[else]  
Increase the volume of the recording  
using server's python script

Send recording
